# FINISH YOUR OFFICE WORK FROM YOUR SADDLE.

Animal Management Studio's (AMS) Pen Rider App.

A smartphone app to record treatments, deads, go homes and access animal treatment history.

A PEN RIDER'S
JOB IS IMPORTANT.

Our app makes it more productive.

Accurately tracking cattle as they rotate through your feedyard and monitoring animal health is directly tied to your operation's bottom line. This important job takes time when riders are documenting animal health status and returning to a computer to input data into the AMS Animal Health System. Turnkey's Pen Rider app lets you track what's happening from your saddle or the front seat of your pickup so it's faster and more efficient.

With the Pen Rider app, feedyard staff have Lot and Pen information as well as animal health histories at their fingertips. That means quicker search times for specific animal history and the ability to enter Treatments, Deads & Go Homes without a time-consuming trip back to the office to check on details.

Available on both Android and Apple iOS platforms, Pen Rider runs live or disconnected for times when no internet connection is available.

Pen Rider Features:
• Lot and Pen information
• Geolocation information
• Withdrawal information
• Animal locations
• Morbidity & mortality history
• Hospital/special pen head counts
• Individual animal information
• Cowboy yard sheet
• View and enter treatments

Customer Service
Developing Software and Solutions for the Cattle Feeding Industry is who we are and what we do. Call **1.800.999.0049** or email **sales@turnkeynet.com** for more information or a demonstration of our system.
